PARMESHWAR DURGIST

SOFTWARE ENGINEER | FULL STACK DEVELOPER

durgistparmeshwar@gmail.com | +91 9657847967 | Pune, MH | LinkedIn | GitHub

SUMMARY

Software Engineer with 2+ years of experience developing scalable web and mobile applications using **React.js, Node.js, Express.js, React Native, Java, Android Java, MongoDB, and MySQL**. Experienced in building responsive UIs, RESTful APIs, database-driven applications, Git/GitHub, Docker, and application deployment. Skilled in leveraging AI development tools such as **ChatGPT, Gemini, Claude, GitHub Copilot, and Cursor** for code generation, debugging, refactoring, optimization, and testing.

WORK EXPERIENCE

Shrenix Marketing Solution Pvt. Ltd. | Software Engineer **Jun 2026 - Present**

Project: Manyyata Foods - E-commerce Platform

Developed a responsive e-commerce platform for product browsing, cart, checkout, order management, and online payments. Integrated REST APIs with MySQL and handled deployment, debugging, and production updates

- Built React.js interfaces and integrated **Node.js/Express.js REST APIs** with MySQL for product, customer, and order management.
- Implemented **Razorpay payment integration**, shipping functionality, and responsive UI for desktop and mobile devices.
- Managed **Git/GitHub, deployment, production updates, debugging, and client requirements** throughout the project lifecycle.

WorknAI Technologies Pvt. Ltd. | Software Engineer **Mar 2026 - Jun 2026**

- Develop scalable web and mobile applications using **React.js, React Native, Node.js, Express.js, MongoDB, and MySQL**.
- Build responsive interfaces and **RESTful APIs** for HRMS, attendance, employee management, and learning applications.
- Manage **Git/GitHub, application deployment, production releases**, and technical troubleshooting.
- Leverage **AI tools such as ChatGPT, Gemini, Claude, Copilot, and Cursor** for code generation, debugging, refactoring, optimization, and testing.

Kodiodo Technologies Pvt. Ltd. | Software Engineer **Sep 2024 - Feb 2026**

- Developed and maintained web and mobile applications using **React.js, Vue.js, JavaScript, HTML5, CSS3, Laravel, Node.js, Java, and Android Java**, with hands-on experience in REST API integration.
- Contributed to **manufacturing management, mobile billing, CRM, and business applications**, implementing features, API integrations, and application fixes.
- Developed responsive web interfaces and Android applications while integrating **REST APIs, backend services, and database operations**.
- Communicated directly with **clients to understand requirements, discuss project updates, clarify issues, and implement requested changes**.
- Collaborated with development teams using **Agile methodologies, Git/GitHub, code reviews, and software development best practices**.

Project: Add on system (manufacturing)

Add-On Manufacturing Management System is a business management platform designed to manage manufacturing operations, including HR, materials, machines, procurement, sales, production, inventory, and reporting.

- Developed and maintained responsive web interfaces using **Vue.js** and backend functionality using **Laravel and REST APIs**.
- Developed modules covering HR, inventory, procurement, sales, production, user management, and reporting.
- Developed production dashboards and integrated API-driven data between web and Android applications.

- Collaborated with clients and senior developers to understand requirements, resolve issues, and deliver requested enhancements.

Project: Mobile Billing System

Mobile Billing System is a web and Android-based application designed to support billing operations and resolve business billing requirements.

- Developed and maintained billing features using **Vue.js, Laravel, and Android Java**.
- Integrated REST APIs for communication between frontend, backend, and mobile applications.
- Investigated and resolved application issues while implementing business-specific enhancements.
- Worked with clients and team members to understand requirements and deliver functional solutions.

Project: Education UPSC/MPSC Learning System

Education UPSC/MPSC is an Android-based application designed to support users preparing for competitive examinations such as UPSC and MPSC.

- Developed Android application features for user management and related workflows.
- Integrated REST APIs to communicate with backend services and manage application data.
- Implemented responsive and user-friendly interfaces following Android development best practices.
- Collaborated with the development team to understand requirements, resolve issues, and deliver application enhancements.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), Core Java

Frontend: React.js,React Native , XML , CSS, Bootstrap

Backend / Data: REST API,Node.js, Express.Js, Java , MySQL, MongoDB

Tools: Git, GitHub, Jenkins , Docker , CI/CD

EDUCATION

- Shree swami samarth institute of management and technology malwadi-bota, MH — MCA — 2024–2026
- New new arts commerce and science college, Ahilyanagar , MH — BCA — 2021–2024
- Jawahar Madhyamik High School, Chanda, MH — HSC — 2020 – 2021

CERTIFICATIONS

- The Complete Full Stack Development Course — Basics to Advanced [2024] — A2Z IT HUB
